What is energy Medicine?

There are multiple disciplines within Energy Medicine; Healing Touch, Therapeutic Touch, Polarity, Reiki, Jin Shin, et cetera. Many nurses and doctors are trained and/or certified in Healing Touch or Therapeutic Touch. Energy Medicine has evolved from Chinese Medicine (the acupuncture meridians), Ayurvedic Medicine (the chakra system) and other investigations into the bio-energy field.

From physics we know that all matter has an associated field of energy with unique frequencies or signatures. In mainstream medicine it is these unique signatures that allow for diagnostic information to be gathered in the form of MRI's, CT's and Radiographs. Energy Medicine is analogous to harmonic resonance where a ringing tuning fork will incite a second tuning fork to vibrate. A trained practitioner (anyone can learn this) can facilitate healing by inviting the client into harmonious resonance thus acting as the initial tuning fork. Such a practitioner can identify areas of concentration or distortion in the energy field that may be caused by trauma as well as unresolved emotional/spiritual experiences. Energy Medicine has been noted to allow for quicker healing, less trauma and blood loss, and faster recovery time from surgery and illness.

Energy Medicine Specialists is a center for excellence in the field of Energy Medicine, dedicated to educating and supporting students, practitioners and clients with the highest of integrity and state-of-the-art information.
